

## MVF 4: Reporting Tool - User Story

Persona: Elisabeth Jones

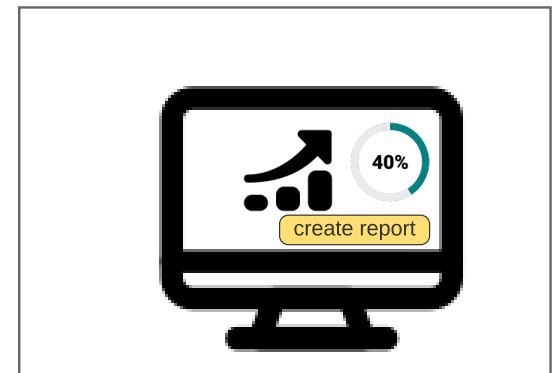

Scenario: Elisabeth exports reports

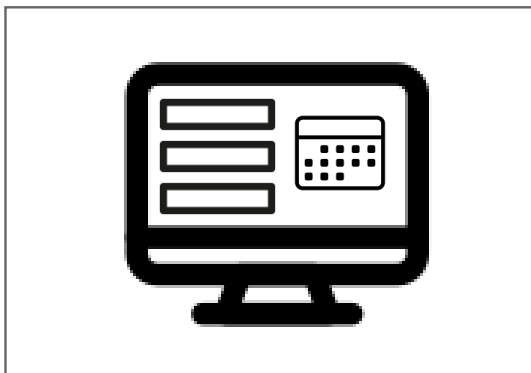

- Elisabeth wants to know more about her water supply
- She would like to check the data to see if there is a pattern

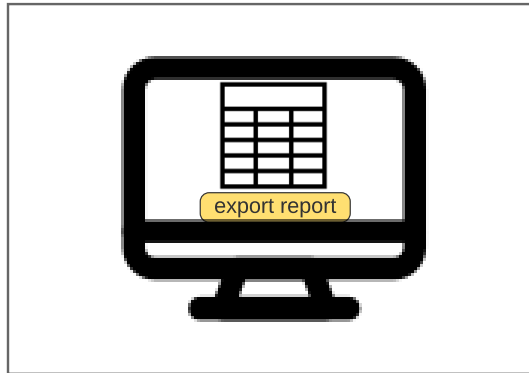

- Elisabeth logs into CyberTank on her personal computer

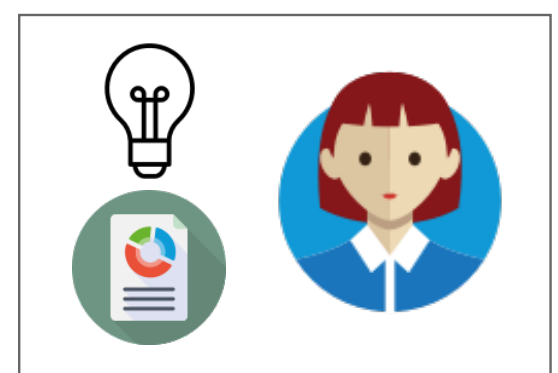

- She checks the dashboard and selects create report

- Elisabeth adds in the type of report and the date range she would like to report on

- Elisabeth views the data on the monitor
- She is happy with the data so exports the report

- Elisabeth can work out the patterns of water collection and usage from the data so she can use her water wisely
